PROFILE

Highly motivated Junior Software Developer currently in my second year of a BSc in Computer Science and Mathematics at UNISA. While this is my second year of formal study, I bring well-rounded, hands-on industry experience gained through real-world software projects prior to and alongside my currently pursued certification. Specializing in cross-platform mobile development with Flutter and modern web technologies, with proven experience building full-stack platforms including booking systems, marketplace platforms, and inventory management software. Currently expanding expertise in data science through ALX Africa. Passionate about clean architecture, scalable system design, and building impactful software solutions.

TECHNICAL SKILLS

Mobile	Flutter, Dart, BLoC/Cubit, Firebase Auth, REST APIs, Clean Architecture, Isar, Android & iOS
Frontend	HTML5, CSS3, JavaScript (ES6+), Responsive Design, Client-side Validation
Backend & DB	SQL, Relational DB Design, CRUD Operations, Firebase, Schema Design
Tools	Git, GitHub, API Testing & Debugging, Agile Practices, Software Testing
Data	Data Analysis Fundamentals, Statistical Thinking, Microsoft Excel, Power BI
Languages	Dart, JavaScript, Python, C++, Java, Git, GitHub
Payments	Payment Gateway Integration (Stripe, PayFast, PayPal REST API), Secure Checkout Flows
Concepts	OOP, Software Architecture, Algorithmic Thinking, Scalable System Design

PROJECTS

PreXpiry · Pharmaceutical Inventory & Expiry Tracking

Stack: Flutter, Dart, Firebase, SQL

- Built a pharmaceutical inventory management system helping pharmacies track stock levels and expiration dates.
- Implemented color-coded expiration alerts and an inventory dashboard with real-time database-driven monitoring.
- Integrated secure payment gateway (PayFast) for subscription-based pharmacy access and billing.
- Designed to minimize medication waste, improve compliance, and streamline pharmacy operations.

GigHost · Artist & Talent Booking Marketplace

Stack: Flutter, Dart, Firebase, REST API, Stripe API

- Developed a digital talent marketplace connecting artists, influencers, and performers with event organizers.
- Built features for artist profile management, availability scheduling, booking workflows, and talent discovery.
- Integrated Stripe payment gateway enabling secure event booking payments, escrow-style holds, and payout flows.
- Architected the platform with a marketplace-style system design for scalability.

Epic · Restaurant Reservation Platform

Stack: HTML5, CSS3, JavaScript, SQL

- Created a web-based restaurant reservation platform enabling customers to browse, check availability, and book tables.
- Built restaurant-side booking management and customer flow tools with a database-driven reservation system.
- Implemented online pre-payment functionality for reservation deposits using PayPal REST API.

SkillBridge · Freelance Services Marketplace

Stack: Flutter, Dart, Firebase, REST API, Stripe Connect

- Engineered a peer-to-peer freelance platform enabling clients to post jobs and hire verified service providers.
- Designed advanced search and filtering, real-time chat, and milestone-based project management.
- Integrated Stripe Connect for split payments, service-fee deductions, and freelancer payouts.
- Implemented review and rating system to build platform trust and quality.

TrackIt · Personal Finance & Budget Tracker

Stack: Flutter, Dart, Firebase, Python (data layer)

- Developed a cross-platform mobile budgeting app with expense categorisation, spending insights, and monthly goal tracking.
- Built Python-based data processing scripts to generate Power BI-compatible reports and exportable financial summaries.
- Designed clean, intuitive UI with interactive charts and BLoC state management.

EDUCATION

BSc Computer Science and Mathematics

2024 · Present

University of South Africa (UNISA) | Second Year

Relevant: Software Development, Linear Algebra, Mathematics for Computing, Algorithms & Problem Solving

Data Science Program

2025 · Present

African Leadership Accelerator (ALX Africa) | 3rd Month

Relevant: Professional training in data analysis, statistical reasoning, and data-driven problem solving. Focus areas include data interpretation, analytical thinking, and building data-informed technology solutions.

Full Stack Software Development Certificate

2025

First National Bank App Academy | 6 Months

Relevant: Comprehensive training in full-stack web development, focusing on modern development workflows and application architecture.

CERTIFICATIONS & TRAINING

Full Stack Software Development Certificate · First National Bank App Academy

Software Engineering Foundations Program · ALX Africa

Data Science Program · ALX Africa

Computer Science & Mathematics · University of South Africa

ADDITIONAL EXPERIENCE

Founder & Creative Director

2022 · Present

Mulanga Productions | South Africa

- Founded a creative digital brand producing event flyers, promotional graphics, and digital media for businesses and events.
- Developed skills in client communication, visual branding, creative problem solving, and digital media production.

Media Team Member

2021 · Present

Church Media Department | South Africa

- Produce graphic design and digital media content supporting church programs, youth events, and community outreach.
- Strengthened team collaboration, leadership, communication, and project coordination skills in a structured team environment.

Freelance Mobile Developer

2024 · Present

Self-employed | Remote

- Delivered custom Flutter mobile applications for small businesses, integrating payment gateways (Stripe, PayFast) and Firebase back-ends.
- Collaborated with clients across e-commerce, hospitality, and services sectors to translate requirements into functional apps.
- Maintained clean, documented codebases and provided post-launch support and feature iteration.

Data & Reporting Analyst (Volunteer)

2025 · Present

Community Organisation | South Africa

- Built Microsoft Excel dashboards and Power BI reports to visualise programme attendance, resource allocation, and community impact metrics.
- Applied Python (pandas) for data cleaning and statistical summaries, enabling data-informed decision-making for leadership.

PROFESSIONAL EXPERIENCE

Lead Software Developer & Solutions Architect

Aug 2025 · Feb 2026

PreXpiry Pharmaceutical Solutions | South Africa

- Served as Chief Executive Developer and Lead Solutions Architect for the development of a pharmaceutical inventory and medicine expiry management platform designed for pharmacies and healthcare providers.
- Led a small multidisciplinary development team, directing software planning, system architecture, feature prioritization, technical implementation, and deployment strategy.
- Gathered and translated business requirements into scalable software solutions, taking ownership of the complete software development lifecycle from concept to implementation.
- Designed and implemented inventory management modules, medicine expiry tracking systems, automated stock monitoring, color-coded alert systems, reporting dashboards, and supplier management workflows.
- Architected secure database structures and business logic to support high-volume pharmaceutical inventory operations while maintaining data integrity and operational efficiency.
- Planned and integrated payment gateway workflows to facilitate secure pharmacy-to-supplier transactions and future digital payment processing capabilities.
- Established software architecture standards, development workflows, and quality assurance processes to ensure maintainable and scalable codebases.
- Collaborated directly with pharmacy stakeholders to identify operational challenges and deliver technology-driven solutions that improve compliance, reduce medication waste, and streamline inventory control.
- Managed technical decision-making, project coordination, feature roadmaps, and team collaboration while ensuring alignment between business objectives and software deliverables.

Remote Full-Stack Web Developer

Nov 2025 · Mar 2026

Epic Restaurant Platform | Remote

- Worked remotely as part of a small development team to design and develop a web-based restaurant reservation and management platform.
- Participated in requirements gathering, feature planning, UI implementation, database design, and system testing to deliver a complete restaurant booking solution.
- Developed customer-facing reservation functionality allowing users to browse restaurants, view availability, reserve tables, and manage bookings online.
- Implemented restaurant administration features including booking management, reservation tracking, customer management, scheduling, and operational dashboards.
- Designed responsive user interfaces using modern web technologies to ensure a seamless experience across desktop and mobile devices.
- Collaborated with team members to improve platform usability, optimize performance, and deliver features aligned with restaurant business needs.
- Assisted with database architecture and backend functionality to support secure reservation processing, customer data management, and reporting requirements.
- Contributed to software documentation, testing procedures, bug resolution, and continuous feature improvements throughout the project lifecycle.
